

Nagy Gouda

*Software developer & Databases management
Design and secure networks*

Spradon Quartz E1-55 Istanbul - Mob +905376959162– mail: masrpro@yahoo.com.com

Career Objective

15+ years' experience with **Microsoft SQL, Visual Basic**, Active Server Pages (ASP), ASP.NET, VB.NET, ADO/DAO, SQL, HTML, Microsoft Office, Microsoft Windows, Microsoft SQL Server, Crystal Reports, Microsoft FrontPage, Wise Installer.

Webmaster for several firms, which run on Microsoft Advanced Server and use HTML, ASP, CSS and DHTML technologies. I have managed Microsoft Exchange Server e-mail systems and internal LAN operations.

Application Development: Microsoft SQL Server, Visual Basic, etc (1997-2013): I am a full-time engineer/developer, writing advanced Microsoft VB applications for a large defense contractor. I previously worked for 15 years as a Visual Studio developer, developing custom software applications for many businesses. The applications I have created have used Microsoft SQL Server, Visual Basic, VB.net, Microsoft Office, Crystal Reports, and others. Technologies such as ActiveX Data Objects (ADO), Data Access Objects (DAO), Active Server Pages (ASP), HTML, Object Oriented Programming (OOP), etc. My clients have included

I have my own system which is a trade mark now "[QuickSale System](#)" Which is considered one of the most powerful systems department stores and accounts in the Arab world now, especially as it is the only program that works as a policy of first In first out.

Experience

Database Application Programmer

1997 - 2005

- hired me to upgrade and modify their inventory, shipping and receiving system to accept electronically submit EDI files and manual data entry of incoming shipments, and to help create the capability to accept bar code scanned receiving and inventory operations for its main warehouse and 120+ retail tire stores. The front-end and processing was built with VB.net and Microsoft SQL Server back-end database.
- I developed single and multi-user applications in Diadora. Developed applications dealing with Grant Accounting, Editorial Contacts, Warehousing Control and Pre-sales Support. Full life-cycle development including requirements gathering, design and data analysis, development, testing, installation, data conversion and user training.

Senior Ajax Programmer

QuickSale System™

2005 - Present

- I made a special system "[quickSale](#)" for warehouse management, accounts and worked on the development and modernization during this period and is now working with many of the major companies in Egypt and the Arab world

Technical Skills

Visual Basic

Considerable experience in dealing with Visual Studio since 1997, and so far, and I designed many systems using ADO/DAO

Visual Basic.net

In the recent period became a professional work with visual Studio Dot Net and i design a complete system for personnel management to the Ministry of Interior of the Saudia arabia using vb.net & Sql Server 2010

SQL Server

Considerable experience in dealing with sql server

Crystal Report

Considerable experience in dealing with crystal report

Description	Years of Exp.	Remark (e.g. Versions)
Operating System		
2000/2003 server - DHCP server - File Servers - Print Servers - Mail Server	5	2005 – 2013
Win 9x/2k/XP/vista/7	12	1995-2013
Database		
Microsoft SQL Server	12	Ver. 2000, 2008, 2010
My SQL	5	2009 - 2013
Crystal Report	5	X1,XI release 2
Programming/Scripting Languages
